

Unmask your child's creativity this summer in the all-new Camp Invention® program, Supercharged, where children build confidence, learn to collaborate and transform their wild imaginations into epic creations. Campers entering grades K-6 will learn creative problem-solving skills while coding and programming futuristic robots, uncovering ancient fossils, designing high-tech superhero gadgets and exploring radio frequencies.

St. Gabriel educators will lead this action-packed program featuring exhilarating, hands-on STEM activities teaching children to question, explore, break through obstacles and embrace failure! Early registration discounts are available!
