

## **Math+: Advanced Mathematics Learning Opportunity**

*Gain an edge – with skills that matter*

This is Mr. David Sabol, the Assistant Principal for Academics at St. Ignatius High School. I have joined RedwoodPrep to teach an Advanced Mathematics class, **Math+**, this Fall for boys and girls in 6<sup>th</sup> to 8<sup>th</sup> grade. This Fall's course focuses on Geometry.

I strongly believe in Math+ and would encourage your family to participate. Each Math+ course explores 1 major idea included in Stanford University's introductory math sequence. This is world-class content tailored to younger students. I continue to be impressed by how students get excited and passionate about math during Math+. We want students to be excited about math – and Math+ does a great job doing just that.

This season's course will be taught at St. Ignatius High School on Saturdays from 2:15 to 3:15 pm starting on Saturday, October 15th for six weeks. The program will cost \$250. Families can sign-up at [www.RedwoodPrep.com](http://www.RedwoodPrep.com).

This Fall's course focuses on Geometry. Geometry focuses on questions of shape, size, space and relative position. The concept has clear practical applications, represents a critical standardized test topic, and forms the basis for most engineering disciplines.

Most interested students can succeed in Math+. I find that students with a gift for math or a real desire to participate can succeed and learn a lot. Students interested in advanced math classes, high performance on standardized exams or general math ability will particularly benefit.

If you have any questions, please reach out. I hope to work with you and your family on this exciting program.

Best,

Mr. David Sabol
